

Comacchio GEO

405

The **Comacchio GEO 405** is a relative heavyweight of ADS' fleet, being second only to the Comacchio 602 in size and weight. Because of these attributes, the 405 is a highly capable and technically advanced drilling rig, frequently achieving depths of c.150 metres using Geobore-S, open-hole and conventional drilling methods. The 405 lends itself well to higher productivity working due to its greater stroke, and with 6.5tonnes of pull-back, it's capable of installing and pulling casing in all types of ground. As with all of our Comacchio GEO series of rigs, the capabilities of the 405 include.

- Conventional rotary coring
- Rotary Open holing
- Dynamic sampling
- SPTs
- U100s and UT100s
- Hollow stem augers up to 200mm diameter
- Post-drilling wash down via fitted pressure washer
- Various flush-media including air, water, air mist, mud and polymers

Comacchio Geo 405		
Total Weight		7000 kg
Dimensions In Transit Mode	Length	7550 mm
	Width (inc. cage)	1850 mm
Dimensions In Use/Erected	Height	6190 mm
	Length (inc. cage)	4760 mm
	Width (inc. cage)	1500 - 1850mm

Please note, dimensions are approximate and must be confirmed with ADS prior to use in calculations
